What movies that families are watching and rentals number?

Total Rentals by Movie Category
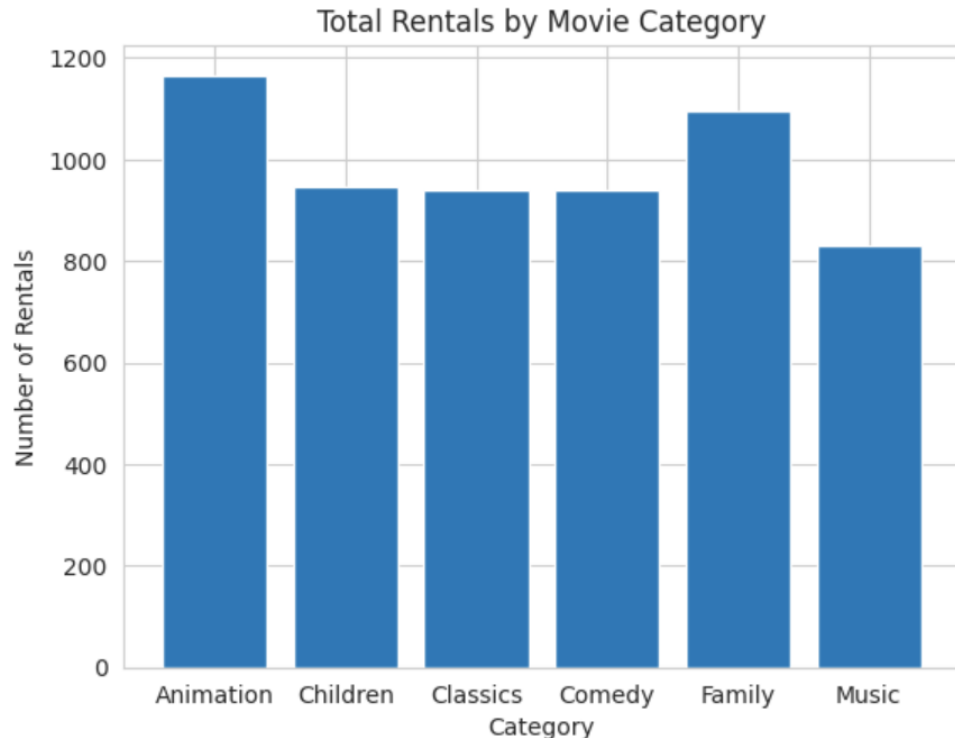

The following categories are typically classified as family movies: Animation, Children, Classics, Comedy, Family, and Music.
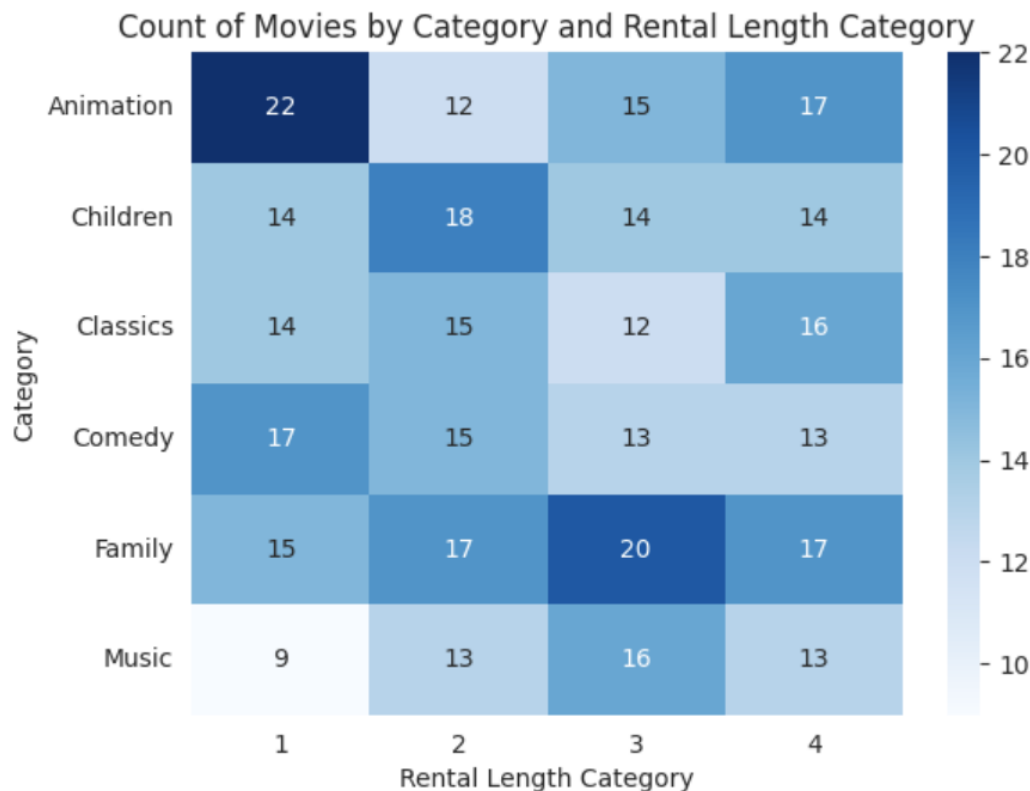

Based on rental numbers, Animation movies are the most popular, followed by Family movies. Children, Classics, and Comedy movies have similar levels of popularity, while Music movies are the least popular among the listed categories.

Rental Duration (Days) by Quartile and Category

Rental Duration by Quartile and Category
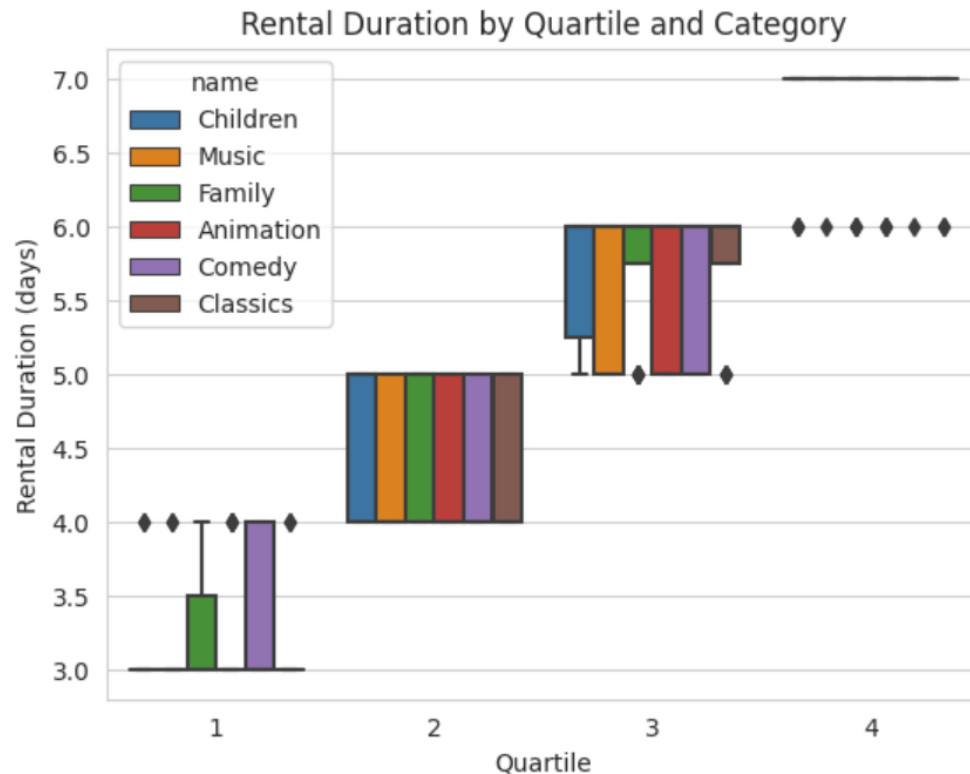

The table displays the rental duration quartiles for family-friendly movies, broken down by movie category. Each quartile is represented by a rental duration category, and the corresponding count of movies in each combination of film category and rental duration category is shown. The table provides insights into the distribution of rental durations for family-friendly movies within each movie category

Family-Friendly Movie Rental Duration Quartiles by Category and Movie Count

Count of Movies by Category and Rental Length Category

|	1	2	3	4
Animation	22	12	15	17
Children	14	18	14	14
Classics	14	15	12	16
Comedy	17	15	13	13
Family	15	17	20	17
Music	9	13	16	13

The table shows the rental duration quartiles for family-friendly movies, grouped by movie category. Each quartile is represented by a rental duration category, and the corresponding count of movies in each combination of film category and rental duration category is provided. The table has three columns: "Category" (which indicates the movie category), "Rental length category" (which indicates the quartile of rental duration), and "Count" (which indicates the number of movies in each category and rental duration quartile). This table provides a detailed breakdown of the distribution of rental durations for family-friendly movies in each category.

Rental Order Comparison by Store, Year, and Month

Rental Orders by Store and Month
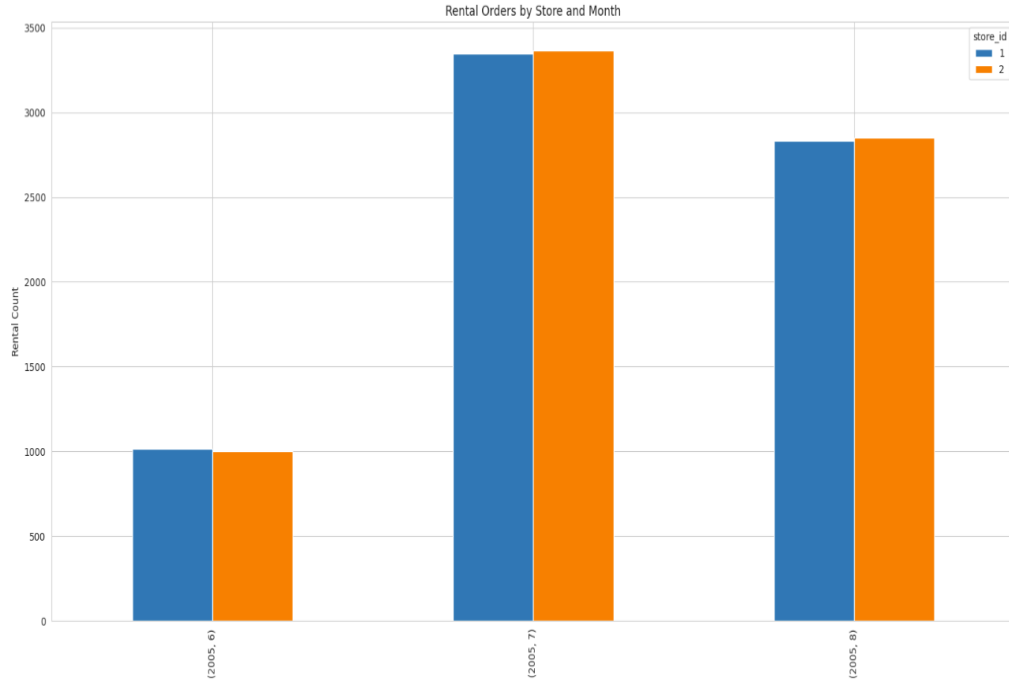

The Rental Order Comparison by Store, Year, and Month table compares the count of rental orders fulfilled by Store 1 and Store 2 during the summer months of June, July, and August in the year 2005. The count of rental orders column specifies the number of rental orders that each store has fulfilled during that month. The data shows that both stores have similar rental order patterns, with the lowest rental counts in June, followed by highest counts in July, and slight decreased counts in August.
